## ► Thank you for your interest in Apache!

This page answers most of the common queries that we receive about our license of the software, and packaging or redistributing it.

Please check the following list to see if any of the descriptions match your situation is described in more detail in the following paragraphs.

## ► Frequent Questions about Apache Licensing

1. [Where can I find the Apache license?](#)
2. [I'm not a lawyer. What does it all MEAN?](#)
3. [Why are the license files for the different Apache Software Foundation projects?](#)
4. [Is 'Apache' a trademark?](#)
5. [Is software from The Apache Software Foundation free?](#)
6. [Is there a fee for using Apache software in a commercial product?](#)
7. [What are the U.S. Export Classification Control Numbers \(ECCNs\) for the Apache software packages?](#)
8. [Can I get Apache software on a CD-ROM?](#)
9. [May I include Apache software or documentation on a CD-ROM I'm making?](#)
10. [May I license my own software under the Apache license?](#)
11. [I've made improvements to the Apache code; may I distribute it?](#)
12. [May I call my modified code 'Apache'?](#)
13. [I have made changes to an Apache package and I want to distribute them. Can I contribute them to the Apache Software Foundation?](#)
14. [May I translate the Apache license into my local language for my redistributed packages?](#)
15. [Is the Apache license compatible with the GPL \(GNU Public License\)?](#)

If none of the above addresses your query, please check the [resources at the bottom](#) for general information.

## ► Answers

Here are the detailed answers for each of the questions above.

### Where can I find the Apache license?

The overriding license text (version 2.0) can be found online at

- [<URL:http://www.apache.org/licenses/LICENSE-2.0.txt>](http://www.apache.org/licenses/LICENSE-2.0.txt)

The older 1.1 version of the license can be found online at

- [<URL:http://www.apache.org/LICENSE-1.1>](http://www.apache.org/LICENSE-1.1)

The older 1.0 version of the license can be found online at

- [Bookstore](#)
- [Feathercast](#)
- [PlanetApache](#)

- `<URL:http://www.apache.org/LICENSE-1.0>`

## **I'm not a lawyer. What does it all MEAN?**

Describing legal documents in non-legalese is fraught with potential for misinterpretation. Notwithstanding the text that follows, the actual text of the [license](#) itself is legally authoritative.

That said, here's what the Apache license says in layman's terms:

**It allows you to:**

- freely download and use Apache software, in whole or in part, for personal, internal, or commercial purposes;
- use Apache software in packages or distributions that you create.

**It forbids you to:**

- redistribute any piece of Apache-originated software without proper attribution;
- use any marks owned by The Apache Software Foundation in any way that might imply that the Foundation endorses your distribution;
- use any marks owned by The Apache Software Foundation in any way that might imply that you created the Apache software in question.

**It requires you to:**

- include a copy of the [license](#) in any redistribution you may make that includes Apache software;
- provide clear attribution to The Apache Software Foundation for any distribution that includes Apache software.

**It does not require you to:**

- include the source of the Apache software itself, or of any modifications you make to it, in any redistribution you may assemble that includes it;
- submit changes that you make to the software back to the Apache Software Foundation (though such feedback *is* encouraged).

See the [preFAQ](#).

## **Why are the license files for the different Apache Software Foundation projects different?**

The various project licenses differ from each other, and the master Apache Software Foundation license, only in terms of attribution requirements and the listing of non-core basic terms are the same for all. In case of question or doubt, refer to the [master license](#).

## **Is 'Apache' a trademark?**

'Apache', 'Apache Software Foundation', the multicoloured feather, and the various project names and logos are trademarks of The Apache Software Foundation, registered by others only with express permission from the ASF. References to any of the

acknowledged with text resembling, 'Apache is a trademark of The Apache Software Foundation, and is used with permission.' This is not necessary in the case of an attribution language such as, 'All marks are the properties of their respective owners'. The ASF Public Relations Committee <prc@apache.org> with all inquiries regarding trademark issues.

### **Is software from The Apache Software Foundation free?**

Yes. All software developed by all projects of The Apache Software Foundation is available without charge from the Foundation's Web sites. This is specified in the Foundation's [Articles of Incorporation](#).

### **Is there a fee for using Apache software in a commercial product?**

No. We do not distinguish between personal, internal, or commercial use of our software. Packaging and redistribution of any of it is subject to the terms of our [license](#), however.

### **What are the U.S. Export Classification Control Numbers (ECCNs) for Apache software packages?**

The ASF has not registered ECCNs for any of the software that is developed and distributed under the ASF license. If a vendor is choosing to distribute ASF software, then the responsibility to get whatever licenses, or other blessings needed for their application is the following from our license:

\* THIS SOFTWARE IS PROVIDED ``AS IS'' AND ANY EXPRESSED OR  
\* WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES  
\* OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE  
\* DISCLAIMED. IN NO EVENT SHALL THE APACHE SOFTWARE FOUNDATION OR  
\* ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL,  
\* SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT  
\* LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF  
\* USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED  
\* ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY,  
\* OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY MANNER  
\* FROM THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY  
\* OF SUCH DAMAGE.

### **Can I get Apache software on a CD-ROM?**

The Apache Software Foundation only provides its software through online download mechanisms. However, any organisation is free and welcome to create a CD-ROM of our packages and redistribute them that way for free or for fee – subject to the [license](#).

### **May I include Apache software or documentation on a CD-ROM I'm making?**

Yes, as long as you comply with the terms of the [license](#). See the [What does it mean](#) for help with interpretation.

### **May I license my own software under the Apache license?**

Certainly. You will probably want to remove or change the parts that specifically Apache organisation. The license concepts are open to re-use.

### **I've made improvements to the Apache code; may I distribute the mo**

Absolutely -- subject to the terms of the Apache license, of course. You can give modified code away for free, or sell it, or keep it to yourself, or whatever you like, but remember that the original code is still covered by the Apache license and you must comply with its terms. Even if you change every single line of the Apache code you're using, the result is still based on the Foundation's licensed code. You may distribute the result under a different license, but you need to acknowledge the use of the Foundation's software, or otherwise would be stealing.

If you think your changes would be found useful by others, though, we *do* encourage you to submit them to the appropriate Apache project for possible inclusion.

### **May I call my modified code 'Apache'?**

In a word, **no**. You may, however, use phrasing such as 'based on Apache', 'powered by Apache', or 'based on Apache technology'. You **must not** use the Foundation's name in a way that states or implies, or can be interpreted as stating or implying, that the product is endorsed or created by the Apache Software Foundation. For example, it would not be acceptable to use a name like 'SuperWonderServer powered by Apache', but it is acceptable to use 'Apache SuperWonderServer'. This is similar to the distinction between a product like 'Microsoft Burp' and 'Burp for Microsoft Windows'.

You may similarly identify the specific Foundation project whose code you're using, such as with 'based on Apache Xerces' or 'powered by Apache Tomcat technology'.

If you wish to use a name including any of the Foundation's marks, such as the Apache logo, it's best to ask our permission first.

### **I have made changes to an Apache package and I want to distribute it. Do I need to contribute them to the Apache Software Foundation?**

No. You can keep your changes a secret if you like. Maybe your modifications are so good that they're embarrassing, maybe you'll get rich selling those improvements. Whatever. But please seriously consider giving your changes back! We all benefit when you do.

### **May I translate the Apache license into my local language for my red Hat Linux packages?**

Yes, you may translate the license text into your local language. However, any translated text is only for the convenience of understanding, and is *not* legally binding. The English-language version of the license, *which you must continue to include in the packaging*, is authoritative and applicable in case legal interpretation is required.

### **Is the Apache license compatible with the GPL (GNU Public License)?**

It is the unofficial position of The Apache Software Foundation that the Apache license is compatible with the GPL. However, the Free Software Foundation holds a different position. Although we have not been able to get them to give us categorical answers to c

asking for details on just what aspects they consider incompatible.

Whether to mix software covered under these two different licenses **must** be a made by those attempting such a synthesis.

### ► Another Place to Look

If you have questions about The Apache Software Foundation, its projects, or its : recommend the following link for more information or assistance:

- The Foundation pre-FAQ: <URL:<http://www.apache.org/foundation/preFAQ>

If you have a question specifically about the Apache license or distribution of Apa and it has not been answered by this page, you may send a message to <human-response@Apache.Org> requesting clarification. **Note:** If you send a question the the information on this page your message *may be IGNORED*.

## Trademarks

### Permitted Use of Netscape Trademarks

Netscape trademarks identify Netscape products and services, and let the public know the source of those products and services. You may make fair use of our trademarks in advertising and promotional materials, and in referring to our products and services (for example, in a magazine article) without our permission, provided you follow standard trademark usage practices and provide proper attribution. Other uses require written permission from Netscape. Please make such requests by [email](#). We will evaluate your request as soon as possible.

In addition, you may not use Netscape trademarks, whether design or word marks, in the following ways:

- In a non-Netscape product name or publication title.
- In, as, or as part of your own trademarks.
- To identify products or services that are not Netscape's.
- In a manner likely to cause confusion.
- In a manner that implies inaccurately that we sponsor, endorse, or are otherwise connected with your own activities, products, and services.
- In a manner that disparages Netscape.

### Proper Attribution of Netscape Trademarks

When you use Netscape trademarks, please include the following brief statement attributing the trademarks to Netscape:

"Netscape, Netscape Certificater Server, Netscape FastTrack Server, Netscape Navigator, Netscape ONE, SuiteSpot, and the Netscape N and Ship's Wheel logos are registered trademarks of Netscape Communications Corporation in the United States and other countries. [List other Netscape product names used in your document] are also trademarks of Netscape Communications Corporation, which may be registered in other countries."

### Netscape Trademarks

Following are Netscape's trademarks. An ® following a name indicates that the trademark has been registered in the U.S. This list is not exhaustive. Netscape may own other trademarks that are not included here.

AutoConfig, AutoUpdate, Client Registry, Client Version Registry, Collabra®, Collabra Share®, Contact, CoolTalk, Expert Alliance, ExpertDesk, Expert-to-Expert, In-Box Direct, ISP Select®, Live 3D, LiveCall, LiveConnect, Live Objects, LiveType, LiveWire, LiveWire Pro, MailCaster, Mozilla, Netcaster, Netcenter, NetHelp, Netscape®, Netscape® Administration Kit, Netscape AffiliatePlus, Netscape® AgentXpert, Netscape Alliance, Netscape® AppFoundry, Netscape® Application Builder, Netscape® Application Server, Netscape® AutoAdmin, Netscape Business Community, Netscape Business Journal, Netscape® BuyerXpert, Netscape® Calendar, Netscape® Calendar Express, Netscape® Calendar Link, Netscape® Calendar Server, Netscape
